Full Stack Developer (m/f/d)

Help us to empower people with language disorders!

neolexon envisions to improve the traditional language therapy practices through digitization. We built easy-to-use solutions that can profit both the therapists and patients alike (e.g. adults after stroke or kids with developmental disorders). neolexon was repeatedly rewarded within the last years and gained a lot of paying customers. Several health insurances already reimburse the costs of our apps for patients.

We are looking for an expert full stack developer to join our great team and scaleup our system:

Full Stack Developer with Backend focus (m/f/d)

Your profile:

- expert programming skills in Node.JS
- knowledge of MEAN stack is a plus
- familiarity with frontend languages (HTML, JavaScript Frameworks and CSS) beneficial
- maintaining AWS like cloud based infrastructure
- experience in system administration and DevOps (specifically AWS Code Deploy and Code Pipeline tools)
- ability to write shell scripts
- experience with Git version management

We offer:

- a job with social impact in an interdisciplinary, international and highly motivated team
- permanent contract and opportunity to equity participation
- full responsibility for your area
- start date 1st April or earlier
- very friendly, inspiring atmosphere and an amazing team
- equipment and quiet team office at WERK1 in Munich

Want to be part of the digital transformation in healthcare? We are excited to hear from you!
