Working Student: Software engineer

Who we are:

CDF Technologies, a Munich-based startup, offers a software solution for investors to optimize their dealflow management. CDF thereby provides a structured process and combines all important functionalities to efficiently view and evaluate startups. With the help of algorithms and AI, startups are classified, evaluated and filtered according to given selection criteria. Thus, the relevance and attractiveness of the applications are determined directly. The integration of CDF into existing CRM tools, e-mail programs and project management tools make Excel lists and error-prone manual activities superfluous.

What we are offering:

- work in a fast-growing startup in the software environment
- flexible working hours up to 16 h per week
- opportunities to implement your own ideas and assume direct responsibility
- dynamic and varied working environment
- office space in the heart of Munich

What we are looking for - You...

- have extended experience in React.js
- know your way around git (ideally in an agile team)
- take pride in your work and are not afraid of getting your hands dirty
- are ambitious to constantly improve and learn new things
- are a team player

Sounds interesting?

Please send your CV to work@cdf.one
